PHAM QUANG HUNG Full-stack developer

📞 0865568301 ✉ hungpham307@gmail.com 🔗 linkedin.com/in/quang-hung-pham 💻 github.com/pqhung3007

As an ambitious developer, I am eager to refine my existing skills and acquire fresh knowledge within a professional setting. My primary goal is to contribute as a full-stack developer, and continue to learn more.

WORK EXPERIENCE

OpenCommerce Group   10/2023 – Present
Full-stack Developer

- Owned small to medium-sized client-side features that enhance the UX and functionalities of Shopbase's web builder and storefront.
- Designed APIs within a microservice architecture using Go and gRPC.
- Collaborated closely with a cross-functional team of **12 members** in clarifying use cases, bug fixes, and developing features.
- Designed tech docs and participated in code reviews with support from senior developers.

Appota   08/2022 – 09/2023
Front-end Developer

- Maintained the Acestarter's influencer web application by refactoring code and adding additional features.
- Implemented Wallacy app using React Native and worked closely with designers to clarify UI/UX problems.
- Hosted **3 tech-sharing sessions** with other freshers: Introduction to microservice, UI principles in web development, and Why do we use Docker?

PROJECTS

FPTUPay e-wallet - Capstone Project   08/2023 – 12/2023
Full-stack Developer & Scrum Master

- **Description**: A unique e-wallet aimed at enhancing financial services for FPT university students including peer-to-peer transfer, semester fee payment, and money deposit/withdrawal.
- **Main technologies used**: React Native, React.js, Springboot, Docker, Kubernetes, ELK stack
- **Responsibilities**:
    - Led the mobile team from designing wireframes to implementing a feature-rich application with **50+ user-friendly screens** using React Native. This app was deployed to Google Play and TestFlight with **86 beta testers**.
    - Implemented the notification service in Node.js that notifies users of balance changes.
    - Managed product lifecycle implementation across **15 sprints** with timely communication and resource allocation.
    - Collaborated closely with **4 members** to define requirements, design diagrams and perform early-staged testings.

Personal Portfolio   04/2023 – Present
Solo developer

- **Description**: A place where I write interesting blog posts about the experiences I have gained as a developer. It could also be considered as my fully responsive online CV. Link to the website
- **Technologie used**: Next.js, TailwindCSS, MDX, Vercel

EDUCATION

FPT University   09/2020 – 12/2023
BSc. Software Engineering

- Cumulative GPA: 8.19/10, with 9.1/10 received in the Capstone Project
- Major coursework: Database, Back-end Development, Project Management, Ethics in IT

SKILLS

- **Programming Languages**: JavaScript & TypeScript, Go, Java
- **Framework & Platform:**
    - React.js, React Native, Vue.js, Next.js, Node.js, Pinia, TailwindCSS
    - Docker, Elasticsearch, Kibana, MySQL
    - Jira, Figma, Postman, Mermaid

- **Technologies & Tools**: MySQL, Elasticsearch, Docker, Jira, Figma, Postman
- **Foreign Languages**: English (IELTS 7.0)
- **Other**: Agile methodologies, Cross-team communication
